EDIT FEATURES

I. Edit Presentation Objects

1. Shape

Under Shape Tab, there are 7 kinds of shapes can be inserted to presentation.

- The Bracket Frame is to add visible frame to items;
- The Invisible Frame is to set the selected items without any borders;
- Circle is to draw circular or elliptical shapes on the whiteboard;
- Rectangle is to add foursquare or oblong shapes;
- Triangle is to add shape of various triangles;
- Line is to make lines on the presentation as items;
- Arrow is a way to connect or decorate items on the canvas.

All added shapes can be selected to set for their sizes and colors.

KEY FEATURES

<http://focusky.com>

2. Text

Text can be added to the slideshow as the instructions or contents. And each added text can be individualized its font family, font size and font style.

3. Image

Add some images on the zooming canvas presentation, so that you can decorate the whole presentation or better explain the added items.

Common types of Image files can be selected, as: *.gif, *.png, *.jpg and *.jpeg.

KEY FEATURES

<http://focusky.com>

4. Flash (swf) & Local Video(flv)

As a vivid and animated digital presentation, focusky supports the importation of Flash files; all SWF files can be selected by the “Add Flash” button from the “Insert Tab” .

Local videos of FLV are important elements for the digital slideshow, once you need some distinct explanations for the elements on the canvas, a prepared FLV would be more directly to view.

5. Online Video

When you are talking some issues, you may find some vivid video from the online videos. In Focusky, we support the online video insertion from YouTube and Vimeo which are two hottest social share medium of online video.

KEY FEATURES

<http://focusky.com>

6. Hyperlink

If you put everything from some web pages on your presentation, it would take you a long time to copy and paste, so Focusky offers you add a link button to your new digital canvas.

II. Edit Path

When you need to edit path? On the digital whiteboard, you have enough space to show your ideas, but all ideas may need an order to show, then you need to set the play order to all added objects.

KEY FEATURES

<http://focusky.com>

On Focusky, you can add any elements from anywhere on the canvas to a new path. The edit path is for you to reorder all added to path elements.

Technically, the edit path will let you add any new element to a new path, delete extra paths, change the previous path route. In addition, new paths can be inserted between two adjacent elements

How to edit path of digital presentation:

PUBLISH INTERFACE

QUICK START

<http://focusky.com>

I. REGISTER

After purchasing Focusky, you will receive a confirm email which contains your order info and license code.

Copy the license code in the confirm email to the Pop-up Register form to finish registration of Focusky. Once you completed the registration, the pop-up register form will never ever appear in Focusky.

In menu bar of software, you can also choose "Help -> About" to enter your license code.

If you are a free user, you can skip the registration.

II. CREATE NEW PROJECT

1. Click Background button to change the background color;
2. Switching to Shape Tab, and then picking an icon on toolbar to drawing on the digital whiteboard;
3. Switching to Insert Tab, you can choose any item from the toolbar, and you can add the item on the digital canvas on any position. Select the added item to edit the properties.
4. Choose elements on the canvas one by one to add them to path. The order in the path would be the play order of your presentation;
5. Come back to Home Tab, you can preview your slide presentation, or you can publish the presentation to Local. For publish, you can press Publish button under the Home Tab, or click publish option under Files, but the most convenient way to publish slideshow in Focusky is press F6 on keyboard. In the publish interface, you can choose an output format and set for properties, then convert the mind mapping presentation in HTML, ZIP or EXE format.

FUNCTION INTRODUCTION

<http://focusky.com>

In Focusky, the presentation is built by different paths of added objects on the digital canvas, and every object is inserted by manual operations. As an important part of the presentation, various files can be regarded as the path of elements. Different insertions have different usages. The detailed text, image, videos are actually powerful instruction of the whole presentation; The shapes, image or Flash can be decorations; The flexible moved canvas is for enough spaces for intelligence.

EDITING - OBJECT

1. SHAPE

Shapes sometimes are decorations, sometimes would be an independent path of the entire presentation. The appearance of added shape are not random set or unmodifiable, you can revise the added shapes by moving the shape to other place on the canvas, changing size, altering stacked sequence, setting border or filling color.
